Companies Announcements Office
Australian Stock Exchange Limited

- **Revenue growth in June quarter**
- **Aeris Hygiene Services fully operational**

Aeris Technologies announced today that total income in the June 2006 quarter is expected to be greater than \$540,000 with product sales revenue in excess of \$350,000.

Sales revenue included early revenue from the Company's USA distributor, following EPA approval of Aeris's pivotal product in March 2006, and from Trane Indochina for the AerisGuard OEM Corrosion Protection product.

The Company is focussed on driving commercial revenues from all its operating divisions and key international markets.

Aeris Technologies has 5 divisions targeting the commercial air-conditioning, residential air-conditioning, commercial cold storage, air-conditioning manufacturing and water treatment markets.

Whilst developing revenues in each division, the Company continues to strengthen its distribution channels around the world with partnerships with 3M and Trane.

Aeris also recently announced the creation of a new direct service business in Australia, Aeris Hygiene Services, to take advantage of the large opportunity in the commercial cold storage market. Aeris Hygiene Services is now fully operational and has already generated strong demand and sales orders from customers resulting in a pipeline of work ahead of the Company's internal plan.

Huw Jones
Chief Executive Officer
