Second EPA Registration Granted in USA

Aeris Technologies announced today that it has received notification from the US Federal EPA that its patented AerisGuard Bioactive Filter Treatment has gained regulatory approval.

The Bioactive Filter Treatment registration is an important milestone for the Company in the USA, and like the recently announced Bioactive Coil Treatment product, will now be able to go through the administrative process of achieving individual State registration.

This product is an important component of the Company's AerisGuard environmental hygiene system being marketed in the USA, the largest air-conditioning market in the world.

The EPA's decision strongly supports the Company's and its US associates' sales activities as they work to secure potentially lucrative contracts in the USA.

Huw Jones
Chief Executive Officer

About AerisGuard

The Bioactive Filter Treatment is part of the patented AerisGuard Hygiene Solutions range of products developed by Aeris Technologies Ltd. AerisGuard cleans and protects air-conditioning and refrigeration systems from commonly occurring bacterial and mold contamination problems. Systems protected by AerisGuard provide significant human health, equipment efficiency and asset management benefits.

Aeris Technologies Ltd has a number of distribution partnerships around the world including 3M in Japan and Trane (a leading global manufacture of air-conditioning and refrigeration equipment) in Indochina.
