Australian Stock Exchange Limited

## **Trane expands relationship with Aeris in Asia**

Aeris Technologies today announced that following the commercial success with the AerisGuard products in Thailand and Vietnam (part of the Indochina region) Trane is now in the process of rolling-out the products in other key Asian markets.

Trane is a global leader in the manufacturing and servicing of air-conditioning systems and currently distributes the AerisGuard Hygiene Solutions and AerisGuard Corrosion Protection Solutions range of products in Indochina. Aeris has made several announcements on the developing relationship with Trane including in July 2006 the purchase by Trane Thailand of its first order of the AerisGuard OEM Corrosion Protection product.

As part of the roll-out the Aeris technical team has recently provided application training to Trane in Singapore and other key Asian markets.

Aeris has had on-going discussions with Trane about strengthening the relationship across the Asia Pacific region subject to the performance of the products in the initial Indochina market. The Company is therefore pleased that Trane is now taking a stronger role in the distribution of both the AerisGuard Hygiene Solutions and AerisGuard Corrosion Protection Solutions across Asia.

Huw Jones  
Chief Executive Officer

**About Aeris Technologies**

Aeris Technologies Ltd is an industrial technology company focusing on the international environmental hygiene and protection market. The Company has three core patented technologies centered on multi-enzyme biofilm removal solutions, residual anti-microbial coatings and corrosion protection coatings. Aeris has developed products for application in the air-conditioning and refrigeration service and manufacturing industries together with the large water treatment market. The Company has a number of distribution partnerships around the world including 3M in Japan and Trane in Indochina.

The AerisGuard Hygiene Solutions clean and protect air-conditioning and refrigeration systems from commonly occurring bacterial and mold contamination problems. Systems protected by AerisGuard provide significant human health, equipment efficiency and asset management benefits.

The AerisGuard Corrosion Protection Solutions include the OEM and the Maintenance corrosion coating products. The OEM coating is sold to manufacturers of air-conditioning and refrigeration systems who experience inherent corrosion issues with their heat exchange coils. The Maintenance coating was developed specifically for application to heat-exchange coils post installation.
