Companies Announcements Office  
Australian Stock Exchange Limited

## **CSIRO Energy Study**

Aeris Technologies today announced that it has entered into an agreement with the CSIRO's Food Science Australia Group to conduct a study to document the energy saving benefits of the Company's unique AerisGuard™ Cool Room Performance Solutions.

The 2 month study will focus on refrigeration systems in cold storage environments with trial sites in Sydney and Brisbane.

The Company's cold storage direct service subsidiary, Aeris Hygiene Services (AHS), has completed over 150 paid remediation jobs since it was established in June 2006 all of which have clearly demonstrated significant improvements in system efficiency and system hygiene.

The key objective of the CSIRO study will be to quantify the energy savings directly resulting from these efficiency gains and thereby quantify the reduction in green house gases resulting from application of the AerisGuard system.

The Company also plans to commission further independent studies to demonstrate the energy savings from the AerisGuard system in commercial air-conditioning systems.

Aeris is confident that the results of the CSIRO cool room study will provide further tangible evidence of the positive impact the AerisGuard system has on the environment and on its customer's bottom line.

The total opportunity for cool-room refrigeration hygiene services in Australia is estimated to be in excess of \$100 million per year and includes the fresh produce, meat, seafood, food retail, hospitality, refrigerated transport and pharmaceutical industries.

Huw Jones  
Chief Executive Officer

### **About Aeris Technologies**

Aeris Technologies Ltd is an industrial technology company focusing on the international environmental hygiene and protection market. The Company has three core patented technologies centered on multi-enzyme biofilm removal solutions, residual anti-microbial coatings and corrosion protection coatings. Aeris has developed products for application in the air-conditioning and refrigeration service and manufacturing industries together with the large water treatment market. The Company has a number of distribution partnerships around the world including 3M in Japan and Trane in Indochina.

The AerisGuard Hygiene Solutions clean and protect air-conditioning and refrigeration systems from commonly occurring bacterial and mold contamination problems. Systems protected by AerisGuard provide significant equipment efficiency, energy reduction, human health and asset management benefits.
